RAVE Emergency Alert System

The RAVE emergency alert system provides NCSSM-Morganton with real-time communications about emergencies and other situations that may impact our community. NCSSM uses RAVE solely to send mass electronic notifications to the campus community wherever they are to help them take immediate action to remain safe during emergencies, such as:

- Building evacuations
- Active shooter
- Weather emergencies
- Building closures due to weather, fire, smoke, etc.

Email and telephone devices are pre-registered to receive RAVE alerts. Students, staff, faculty and parents receive RAVE alerts on their personally owned electronic devices:

- **Text Messages**: subscribers receive RAVE text messages on their personal cellular phones.
- **Email**: Subscribers receive RAVE email messages at their personal email address.

Registration is Free, Simple and Already Done!

All staff, students, parents and guardians are automatically registered to receive emergency texts via the emergency contact information you have already provided!

Please remember that RAVE will only be used to send safety or emergency information pertaining to NCSSM-Morganton. It will never be used for non-emergency communication such as advertising or general announcements (e.g., bake sales).

Depending on your cellular carrier, your RAVE text alerts will arrive from short code number 226787, 67283, 78015, 81437 or 22911. Upon receiving alerts, you may choose to store the number in your cell phone and label it “RAVE Emergency Alert” to more easily identify the nature of future messages.

RAVE will never be used to collect, store or use personally identifiable information such as date of birth, Social Security number or driver’s license number. Only your contact information is kept within our system.
