NCSSM LiveSafe Mobile App

NCSSM LiveSafe is a mobile app available for free through the Apple App Store and Android App Store that offers real-time, two-way communication between NCSSM community members and Campus Safety and Security. The major features of the app are described below:

Emergency Contact
NCSSM LiveSafe provides quick call access to emergency contact information for 911 and Campus Safety and Security, as well as the ability to send a text message directly to Campus Safety and Security.

Submit Tips
The app allows users to submit tips by text, photo, video and audio, about anything from assault to suspicious activity. Campus Safety and Security monitor tips submitted through the app 24/7 and can engage in two-way chats with users to obtain additional information.

GoSafe
The app also uses GPS technology and allows friends and family to “GoSafe” a user to his or her final destination by tracking the individually virtually on a map to ensure they arrive safely at their destination. Users can also request a “Campus Safety Escort” were a Campus Safety and Security Officer will escort a user to his or her destination on campus. App users must initiate a request or accept a request to safe walk a contact to enable the GPS tracking. Location services must be enabled for this service.

Check In / Check Out
The app also users to “Check Out” when they leave the NCSSM and “Check In” when they return to campus. Users can also interact with Community Coordinators to clarify information or update return times.
