Innovation continues to thrive at North Carolina School of Science and Mathematics thanks to generous and passionate donors like you who make possible a nurturing learning environment that encourages innovative thinking, entrepreneurial ideas, and self-actualization.

Just look at what you accomplished during the fiscal year:

- Two new endowments were created supporting faculty excellence and the science and mathematics departments.

- The Student Research, Mentorship, and Innovation Endowment expanded opportunities for NCSSM students. The one-to five-week Summer Research Internship program began with 35 students in the summer of 2013 and had grown to serve 146 in the summer of 2017. Students, online and residential, conducted research at university, institute, and commercial sites, working with fossils, machine learning, nanotechnology, politics, environmental science, and many other disciplines.

- STEP Up to STEM served 53 students in its fourth year. The two-week summer program for underserved ninth graders engaged them in interdisciplinary science, mathematics, engineering, and leadership development. They learned to develop research questions, participated in a STEM career night, and visited Bayer CropScience.

- Thanks to the generous support of the Burroughs Wellcome Fund, the North Carolina Student Academy of Science was able to send seven students from three schools to the American Junior Academy of Science/American Association for the Advancement of Science conference, where they were able to interact with professional scientists and present their own research.

- The Peter T. Haughton Fabrication & Innovation Lab, opened in FY 2015-16, has become a center of creativity and innovation on campus, as students use the 3D printers and computer-controlled cutting machines to make everything from prom props to anatomical models to robot parts.

Every student who enters NCSSM’s residential program, enrolls in a distance learning class, or participates in an enrichment workshop does so with their future in mind. That they have this opportunity to design their future and embrace their passions is due in large part to the cumulative efforts of our donors. We see your previous efforts paying off so handsomely now, and I know you share my excitement about what we are capable of doing together in the future.

Sincerely,

Katie T. Wagstaff
President, NCSSM Foundation
2016-2017 NCSSM Foundation Board

Our second Giving Tuesday tops participation goals, draws support, engagement

NCSSM’s second annual #NCSSMGives campaign—held on Giving Tuesday, an international day of giving in late November—drew wide-ranging support from alumni, families, leadership, friends, and more.

The first gift arrived shortly after midnight, and giving continued well into the following night. By day’s end, donations totaled more than $36,000 in support of the NCSSM Foundation. Participation in the event was especially encouraging, with the number of donors growing by nearly 25% over the previous year. Nearly all of the school’s alumni classes had members donate, with 32 out of 35 classes, or 91% participation, up from 82% of classes in the previous year. The Class of 2007 increased its support thanks to the generosity of an anonymous donor from the class, who offered to double match all donations from the class on Giving Tuesday.

The giving day also helped expand the school’s base of support, drawing in 47 new donors, an increase of 42% from the previous year. In addition, 6 new recurring gifts were set up, which will allow the Foundation to receive consistent support throughout the year.

As an event based largely on social media, many donors also took the opportunity to share their thoughts on why they choose to give to NCSSM on platforms like Facebook, Twitter, and Instagram. Parents spoke of the impact the school has had on their children; students and alumni shared stories of the role NCSSM has in their lives; and others acknowledged the broader influence NCSSM has on the state of North Carolina and beyond.
NCSSM embraces sustainability with solar panels, sustainability garden

Sustainability at NCSSM has been a growing focus ever since its inclusion as an institutional priority in NCSSM’s Strategic Plan.

This year, those efforts took a significant leap forward with the installation of a solar array and the creation of NCSSM’s sustainability courtyard.

NCSSM’s solar panel installation was the result of a grant from NC GreenPower, as well as private contributions to NCSSM’s Environmental Sustainability Fund, with additional funding from the State Employees Credit Union Foundation. The solar system includes 12 Sunpower solar modules, interactive inverters, and Internet monitoring systems that provide solar irradiation, ambient air temperature, module temperature, and other data, and produces an estimated 6,570 kilowatts of power.

Private funding also supported the creation of the Sustainability Courtyard at NCSSM. Included in the courtyard are a student-designed erosion control garden that uses carefully placed ground cover to mitigate a previous erosion problem and a dedicated cistern that collects rainwater runoff from a nearby roof to irrigate the garden through an underground drip-irrigation system.

NCSSM continues to work toward a more sustainable future. Since the fiscal year has ended, NCSSM has broadened its successful composting program to include food waste from residence halls and the cafeteria. On the horizon next: expanding recycling opportunities across campus by placing paired recycling and trash bins in key locations around campus, and creating a second erosion-control system.
Donor participation is one of the most important non-academic metrics by which an institution’s value is measured. A philanthropically engaged constituency is a sure sign that a school is held in high regard by the community. And there is confidence in numbers: The more people who give, the more others are inspired to do so.

As might be expected, alumni and parents set the pace for fundraising participation at NCSSM this year. Most notable among initiatives focusing on these core constituencies in 2016-2017 were the Foundation’s March Madness challenge and a mid-winter parent challenge. March Madness, designed to channel and reflect the excitement of the NCAA basketball tournament, sparked a friendly competition among classes to see which would have the highest percentage of supporters of the school. Nearly 20% of the Class of 2000 made a donation to the NCSSM Foundation. The Class of 1988 was close behind with just over 18% participation.

The challenge brought the highest and most widespread participation yet, with 33 out of NCSSM’s 34 alumni classes participating. Since 2014, donor participation in the campaign has more than doubled.

Juliana Miller, from the winning Class of 2000, summarized donor motivation perfectly. “We wouldn’t donate if it wasn’t for something we believed in,” she says. “And we all still believe in Science and Math.”

Families are another key donor constituent of NCSSM. Parents, grandparents, siblings of current students, and alumni of both residential and online programs all contributed significantly to the NCSSM Foundation. And while the school has a solid base of supporters among families, a month-long parent giving challenge in February gave many the opportunity to engage with the school as a donor for the first time. Of
the 113 families participating, 77 were new donors to the school.

Challenges like this are critical in helping inspire others to support the school and increase the impact of those gifts, says Lauren Wiggs ’00, then development director at NCSSM. “The charitable support of families is essential to our students’ experience. We absolutely want to maximize opportunities like this one to increase the impact of each gift.”

Brock Winslow ’86, vice chancellor of institutional advancement and NCSSM parent, reinforces Wiggs’s point. “Our students and alumni and their families readily testify to the transformative effect of the NCSSM experience—which, since 1980, has been made possible by charitable support from friends, families, employees, and now, alumni,” he says. “In fact, NCSSM simply would not exist and operate today without the generosity of our donors.”
Endowment supports student innovation, research

NCSSM offers students extraordinary opportunities to engage in meaningful research, both on and off campus. Many of those opportunities have been made possible by the support of private donors like the Burroughs Wellcome Fund.

This year, the Burroughs Wellcome Fund, through its Endowment for Student Research, Mentorship and Innovation, not only helped NCSSM increase the number of students served through the Summer Research Internship Program, but also allowed the school to form new mentor partnerships and broaden the range of research opportunities available to both residential and online students.

The Summer Research Internship Program is an application-based research experience that allows students to live on NCSSM’s campus while engaging in high-quality, experiential learning opportunities at NCSSM or at locations throughout the Triangle. NCSSM even provides transportation to research locations.

This past summer, NCSSM students conducted research with professors and experts at Duke University, Lenovo, NC Central University, NC State University, NC Research Center in Kannapolis, NCSSM, RTI International, and the University of North Carolina at Chapel Hill.

Summer researchers pursued their passions in a number of topics in STEM, humanities, and the social sciences. From fossils to machine learning to nanotechnology to politics to environmental science, students engaged intensively in projects of special interest and importance to them. That’s a transformative opportunity very few high school students in the world can access, and one NCSSM is proud—and grateful—to be able to provide.

NCSSM provided me and thousands of students an invaluable social and educational experience. I adore North Carolina and am emotionally indebted to the state thanks to NCSSM. Giving to NCSSM is what keeps the school moving forward. Like all intellectual communities, it is driven by those who make it up.

2016–2017 Annual Report
NCSSM provided a wonderful opportunity to two of my daughters, who each benefitted from this experience but in vastly different ways. I hope that what little I give can help others to benefit from this educational experience.”

I support NCSSM because I believe it is a terrific way to advance our statewide impact on supporting our most talented high school students and our local schools from all corners of NC to advance STEM education.

—Tom Williams, Board of Trustees
“I don’t think that I’ll ever be able to repay for my experience, but I give to NCSSM because I want to show my appreciation for the invaluable academic resources and social experiences provided to me within the past two years.”
